Summary

Software Developer with hands on experience building production ready web and mobile applications using React.js, Next.js, TypeScript, Node.js, and Capacitor.js. Proven ability to deliver responsive, SEO-optimized solutions with modern UI patterns, API integration, and clean, scalable code architecture. Experienced in working across frontend, backend, and mobile deployment workflows, with a strong focus on performance and maintainability.

Technical Skills

Languages: JavaScript, TypeScript

Frameworks: React.js, Next.js, Nest.js, Capacitor.js, Tailwindcss, Shadcn/ui, Redux-toolkit, React-Query, PostgreSQL, Supabase

Developer Tools: Git & Github

Experience

Software Developer

Feb 2026 - Present

Digitenium (Remote)

Tools Used: Next.js, TypeScript, Tailwindcss, Node.js, Capacitor.js

- Developed and maintained production-ready web interfaces using Next.js and TypeScript, ensuring performance and responsiveness across devices
- Built and enhanced mobile application features using Capacitor.js, enabling seamless web-to-iOS deployment
- Tested and optimized application performance on iOS devices (iPhone) to ensure stable user experience
- Integrated frontend with backend services through REST APIs, improving data flow and application functionality
- Contributed to backend development tasks using Node.js, supporting feature implementation and API improvements
- Managed iOS build configuration and successfully deployed applications via Apple App Store Connect
- Deployed and released the application on the iOS App Store, ensuring smooth production rollout

Next.js Developer Intern

Aug 2025 - Nov 2025

Inflancer Technology (Remote)

Tools Used: Next.js, TypeScript, Tailwindcss, Redux-toolkit, Shadcn/ui, Framer motion

- Enhanced user experience by implementing skeleton loading screens and progressive rendering techniques to reduce perceived load times and maintain engagement during data fetching
- Implemented comprehensive SEO strategy including robots.txt configuration, XML sitemap generation, and metadata optimization to improve search engine visibility and rankings
- Engineered multilingual public health website supporting Nepali and English languages using next-intl library and Next.js App Router architecture
- Built enterprise-level Admin Dashboard and Content Management System (CMS) utilizing Redux Toolkit, RTK Query, Tailwind CSS, Shadcn/ui components, and React Hook Form (RHF)
- Collaborated with backend development team to integrate RESTful APIs and optimize CMS workflows for improved efficiency
- Implemented Base64 image encoding system for optimized file uploads and seamless data transmission to backend services

Frontend Developer Intern

Feb 2024 - Apr 2024

Plutonic Tech

Tools Used: React.js, JavaScript, Scss

- Developed a personal e-commerce project from scratch using React.js, Context API and SCSS, implementing features like product filtering, wishlists and a responsive UI.
- Enhanced WordPress website UI/UX using bootstrap and vanilla JavaScript for engagement.
- Supported CRM front-end architecture & interaction flow.

Projects

Tournaop | *Next.js, TypeScript, Tailwindcss, Framer-motion*

[Live](#)

- Built Tournaop, a high-performance static website using Next.js (SSG), TypeScript, Tailwind CSS, and Framer Motion, delivering a fully responsive UI with smooth, accessible animations.
- Implemented advanced SEO optimizations including Open Graph metadata, sitemap.xml, robots.txt, and image optimization, achieving 100 SEO score and 0.8s LCP in Lighthouse audits.
- Optimized web performance and accessibility, reaching 99 Performance, 93 Accessibility, 100 Best Practices, and 96 Core Web Vitals, ensuring fast load times and WCAG-aligned UX.

Popcornpix | *React.js, TypeScript, Tailwindcss, Shadcn/ui, React Query, Supabase*

[Live Github](#)

- Integrated TMDB API for real-time movie data using React Query, implementing client-side caching and background refetching to improve performance and data consistency.
- Implemented secure authentication with Supabase, supporting Magic Link and Google OAuth, along with protected routes and session handling.
- Built a scalable, responsive UI system using React, Context API, custom hooks, Shadcn/ui, and React Hook Form, enabling efficient state management, reusable components, and robust form validation with error handling.

Certifications

- **React Foundation for Next.js (2025)**
- **Fullstack Development using MERN (2024)**

Education

Bachelor of Computer Application

2021 - Present

Nagarjuna College of IT, Lalitpur
